

Take the Best Path.

Gap Analysis

One of our subject matter experts (doctorate- and master's degree prepared nurse with extensive experience in Magnet and Pathways) will travel to your hospital and work with your team for a two-day analysis of your organization. We will:

- Share empirical evidence supporting the value of Pathways designation to your organization and your patients.
- Analyze your hospital's practice standards, operating policies, procedures, and management structure in order to determine if you meet (or are close to meeting) Pathways requirements.
- Coach your team about the critical role of both data and documentation.

Document Review

Our writing team takes a unique approach to reviewing your documents:

- We have a deep understanding of the requirements, along with the latest updates.
- We work "in" your document and give specific counsel on ways to strengthen the narrative.
- We prompt your team for missing information and tell your writer exactly what is needed and where it belongs in the narrative.

Nurse Survey Preparation

- Communication campaigns that help to explain the importance of the survey, and what to expect and help boost participation.
- Showcase the value of your nursing team and how that is integrated throughout the organization.
